Skills

Languages: Python, Java, C, JavaScript
Backend: Node.js
Frontend: React, Angular-Basics, HTML, CSS
Clouds & Databases: SQL, MongoDB, Firebase
Developer Tools: VS Code, GitHub,

Work Experience

Cloud Computing Trainee Intern

June 2025 – July 2025

ETS (Eagle HiTech SoftClou Pvt Ltd), Inperson

- Worked on the **CMAC Project** as an analytics trainee, focusing on cloud-based reporting and monitoring.
- Assisted in understanding and documenting **cloud environment policies** and best practices for infrastructure setup.
- Gained exposure to industry tools and workflows in cloud management and compliance tracking.

Projects

Blood Bank Management System (March 2024 – April 2024)

- Developed a Blood Bank Management System using Angular and Firebase to manage donor records, blood inventory, and hospital requests.
- Enabled real-time tracking and efficient blood donation management.

Marine Time Boundary Detection App (2025)

- Built a web application using HTML, CSS, and JavaScript for detecting marine boundary zones.
- Integrated **Google Maps API** for real-time boundary visualization and simulation.
- Enabled users to monitor vessel positions and receive alerts upon entering restricted zones.

Legal Demystifying Agent (GenAI Exchangethon) (September 2025 – October 2025)

- Built an AI-powered legal query assistant using the Google Gemini API to simplify legal documents and provide contextual explanations.
- Enabled multilingual support with translation between English and Tamil for regional accessibility.

RAG Chatbot for Students – Gemini API (September 2025 – October 2025)

- Developed a **Retrieval-Augmented Generation (RAG)** chatbot that answers student queries using **Natural Language Processing (NLP)**.
- Implemented context retrieval from uploaded PDFs with language chunking and **Gemini API**-based embeddings.
- Built a user-friendly chat interface for students using **React** and integrated the backend with **Python Flask**.

AI Retail Super Brain – Walmart (July 2025)

- Developed an AI-driven retail assistant using **React**, **Workato**, and NLP for dynamic pricing and customer query handling.
- Built real-time dashboards to display key metrics like sales, inventory, and customer feedback.
- Automated pricing, inventory updates, and support workflows through Workato integrations.

Virtual Assistant - Jarvis (June 2025)

- Developed a Python-based virtual assistant named **Jarvis** capable of performing basic desktop automation tasks.
- Implemented features such as greeting the user, performing Google searches, and opening system applications.
- Utilized libraries like `pyttsx3`, `speech_recognition`, `webbrowser`, and `os` for voice interaction and automation.
- Enabled hands-free operation and basic NLP-based command parsing to enhance user experience.

Education	
Rajalakshmi Engineering College,Chennai	2023 - 2027
B.Tech in Computer Science & Engineering	8.19/10 CGPA
Achievements	
Hacktoberfest 2023–2025	
Completed multiple open-source contributions across Hacktoberfest 2023, 2024, and 2025 editions.	
Google Arcade Program	2024 – Present
Participated in the Google Arcade Program, completing milestones and skill badges under guided learning tracks.	
Altrusity Coding Challenge	2024
Participated and demonstrated strong problem-solving skills in the Altrusity Coding Challenge.	
Workato AI Hackathon	Jul 2025
Secured a position in the Top 10 Teams among 130 participants for innovative AI automation solutions.	
Dev Arena TVS Use Case Hackathon	Oct 2025
Ranked in the Top 5 Teams among 200 participants in a real-world industry hackathon hosted by Easwari Engineering College.	
Certifications	<u>Source</u>

- Get Started with Python – Google (Coursera)
- Master C Programming with Data Structures – GeeksforGeeks
- Introduction to HTML – Infosys
- SQL Essential Training – LinkedIn Learning
- C Programming Basics: Flow Controls, Variables and Pointers – LinkedIn Learning
- Java Programming Masterclass for Software Developers – Udemy (Completed)
- The Complete 2024 Web Development Bootcamp – Udemy (In Progress)
